

Site Licence (Multi-User)

v3.1 September 2020 Copyright (c) 2001-2020 Graphity! Supersedes all previous versions.

The Site Licence is an alternative to the [Standard Licence](#) (1-Person/10 Computer max.) for when you need more than one person to have access to the fonts and/or when you have more than 10 computers. Generally all the conditions of our standard [Licence Agreement](#) apply to the Site Licence but with the additional special features listed below.

The cost of a Site Licence is based on the estimated maximum number of computers on which you would like to install the fonts – rather than the total number of actual users with access to those computers. If you use a network, the licence cost is based on the the number of computers which would have access to the fonts via the network.

Generally, Site Licences are purchased in the name of – and for the use of – an organisation (school, business etc) rather than an individual.

Site Licences can now be purchased online. Click the **Choose Licence** button next to the item/s on our Shop page and then from the menu choose the Licence for the number of computers/devices on which you want to install the fonts eg "1-25 Computers/Devices (Unlimited Users)". If it's more than 200, enter the exact number in the box – the total will be calculated in the Cart. Click **Add to Cart**. The correct Licence and cost will display in your Cart. If you need to, you can change your Licence choice in the Cart and then click **Update Cart**

The major special features of the Australian School Fonts Multi-User Site Licence are as follows:

1. This Site Licence fee is a **once-only charge**. No fee will ever be charged in the future provided the number of computers does not significantly exceed the original estimate. Should the number of computers expand significantly (greater than a 10% increase on the original estimate), all you need to do is advise us and a pro-rata additional onetime fee will apply. Please note that there are no refunds for decreased computer numbers.
2. The Site Licence fee **includes the supply of the fonts and manuals**. The Site Licence fee does **not** include the supply of an official hardcopy backup (USB or DVD) which may be purchased at additional cost (see [Price List](#))
3. The Site Licence **permits installation of the fonts only on computers which are predominantly used at and/or for the organization** which purchased the Site Licence. The number of users is not limited but all users must be associated directly with the licensee organization. The purpose for which the fonts are used must be associated directly with the licensee organization.
4. The Site Licence is strictly **non-commercial** i.e. the items produced using the fonts (e.g. book, pdf publication, computer application, app etc) may not be sold neither by direct sale nor by any form of subscription/membership. If would like to sell the produced items commercially you will need a separate [Publishing Licence](#) – cost available from us on application.
5. The Site Licence **does not extend** to the use of the fonts for embedding in a website. If would like to embed the fonts in a website you will need a separate [Web Licence](#) which also includes supply of the fonts in all the required web formats – cost available from us on application.
6. The Site Licence **excludes** the right to sell, distribute, gift, embed or otherwise disseminate the files (fonts and manuals) in any way which results in access being provided to users who are not covered by the Site Licence.
7. The fonts may be installed either on **individual computers or on a network server, or both**. If installed on a network the total number of computers with access to the network may not exceed the maximum number of computers permitted by the Site Licence.
8. The Site Licence includes an ongoing entitlement to **free updates and upgrades** to the fonts and manual as and when they become available. If and when required, fonts will be updated to take account of changes to computer operating systems. This especially applies to iOS, Android and Windows RT used in iPads, tablets, smart phones etc whose operating systems are evolving at a very fast rate compared to desktop computers.
9. The Site Licence includes **free technical support** (phone and email).
10. The font files are compatible with **Windows, Macintosh and Unix**.
11. The fonts can be professionally **customised** by us to suit your special requirements. The costs for this customisation are additional to the basic Site Licence cost – quotations will be provided on application.
12. In addition to the above special Clauses, the conditions of our standard [Licence Agreement](#) apply in full with the exception that the maximum number of Workstations is changed from "10" in the Standard Licence to the number stipulated in your official Site Licence invoice/receipt.
